

Bow Roller Selection Guide

WHICH BOW ROLLER IS RIGHT FOR YOUR ANCHOR?

SaltGear offers two styles of Bow Rollers that work with all types of anchors:

- 1) **Fixed Head, Self-Launching Bow Rollers:** are designed for use with all modern one-piece plow style anchors like the SaltGear TPX, Rocna, Rocna Vulcan, Ultra, Manson Supreme, Mantus and Lewmar Delta. These can also fit Fortress and Guardian anchors by removing the top roller and moving the front roller to the center position (see Fortress Anchor Selection Guide).
- 2) **Pivoting Head, Self-Launching Bow Rollers:** are designed for use with Claw type anchors also known as Bruce, Rocna and SaltGear CX and XR style. It is important to match your anchor with the correct bow roller for maximum performance and usability:

Follow the GUIDE below for correct selection:
