

## CX Anchor High Holding Power Low Weight

Based on the famous Bruce anchor design, which was originally made for use on oil rigs in the North Sea, the CX sets fast and secure to almost any bottom condition. Constructed of Solid AISI 316L Solid Stainless Steel plates (not casted) for the best corrosion protection and unmatched strength. Wing sizes of the fluke are 25% larger on the CX than on the corresponding Bruce size for the best possible holding power.

### Available Models:
